Hello, I'm Enes, while I mostly focus on front-end development, I also have some back-end knowledge. I'm trying to make the applications I write full stack so that I can learn back-end technologies while improving my front-end skills. While focusing on responsive and fluid design, I also try to improve my back-end skills in MERN projects. Apart from that, I follow the UI / UX designs up to date. I effectively use Adobe Photoshop, Adobe XD, Adobe Illustrator, CorelDraw and Figma programs in designs.

EXPERIENCES

UKCTM, Birmingham, UK – Freelancer Web Developer

Jun 2023 - Currently

Satasoftware, Ankara, Türkiye - Full-Stack Developer & Social Media Managment

Aug 2022 - Jan 2023
